BRUSHES

royalbrush.com

ANATOMY OF A BRUSH

All brushes are made of four parts: the tip, reservoir, ferrule and handle.

HAIR TYPE

The quality and availability of a natural hair affects the price of a brush. The mixture of different diameters of synthetic filaments also determines the cost, as each filament is individually extruded.

hair type	density
Pony	Soft Natural Bristle
Fitch	Soft Natural Bristle
Camel	Soft Natural Bristle
Sable	Soft Natural Bristle
Squirrel	Soft Natural Bristle
Ox	Medium Natural Bristle
Goat	Soft Natural Bristle
Boar or Hog	Stiff Bristle
Synthetic, Multi-Diameter	Soft to Medium
Nylon	Medium to Stiff
Synthetic Bristle	Stiff

FERRULE TYPE

The ferrule is one of the most important parts of the brush because it holds the bristles and connects all parts of the brush. Best quality ferrules can represent up to one-third the cost of the brush.

ferrule	benefits
Plated Brass	The highest quality ferrule, nickel, copper, gold or black-plated brass represent the most durable ferrule. They are used on best quality brushes. They do not rust and will not deform easily.
Aluminum	Seamless aluminum ferrules are rust proof and will not allow solvent to affect the brush head. An aluminum ferrule is softer than brass and as a result can be deformed more easily.
Plastic	A plastic ferrule is typically used for disposable brushes.

HANDLE TYPE

The handle type can determine the cost and durability of a paint brush.

handle type	Benefits
Acrylic	Best for water-based mediums. It will not absorb water and therefore will not expand and contract. The beveled end is used for burnishing, scraping, and removing color. Very durable.
Kiln-Dried Hardwood	Assures that brush heads stay firmly crimped.
Polymer	Economical, excellent for water-based mediums as it will not absorb water. Very durable.
Silk Touch™	A rubberized coating used to add comfort for the artist and protect the brush handle.

HANDLE LENGTH

The type of medium used and the amount of small detail being painted determines the choice of handle length.

handle length	uses
Standard	Also known as watercolor length. This brush length is ideal if you like to work close to your painting.
Long/Easel	Used for oil and acrylic painting at an easel. A long handle brush allows the artist to step back from the painting to get a better perspective of what is being painted.
Short	Usually used on craft brushes or brushes designed for children. Allows the artist to be closer to their work for more control.
Ultra Short/Mini	An ultra short brush handle is best for very small detail work. This brush length is ideal for miniatures and models.

HOW TO SELECT BRUSHES

Look for the star rating near the top of each page. The more stars you see, the better the quality.

Best Quality ★★★★★

Best brushes are made with top quality hairs, handles and ferrules and are manufactured to the highest exacting standards.

Better Quality ★★★★★☆

Better brushes provide an upgrade in quality and in manufacturing standards.

Good Quality ★★★☆☆ | ★★☆☆☆ | ★☆☆☆☆

Good brushes are perfect for beginners of all ages and for those who wish to experiment with a different style or type of brush. A three star rating is a slightly better quality than a two star and a two star is slightly better than one.

head filaments	medium	surface
Soft Natural 	Acrylic, adhesives, alkyds, craft acrylics, gouache, glass paints, oils, tempera, watercolor, hobby paints	Canvas, canvas board, masonry, wood, glass, glazed ceramic, ceramic bisque, metal, plastic, plaster, silk, masonite, rocks
Bristle <i>(natural or synthetic)</i> 	Adhesives, oils, gel mediums, tube (high viscosity) acrylics – generally for heavier bodied media	Canvas, canvas board, masonry, wood, masonite, concrete, ceramic bisque
Synthetic 	Acrylic, adhesives, alkyds, craft acrylics, gouache, glass paints, oils, tempera, watercolor, hobby paints, fabric paints	Canvas, canvas board, masonry, wood, masonite, glazed ceramic, ceramic bisque, metal, plastic, plaster, all fabric, concrete

BRUSH STORAGE AND CARE TIPS

1. Wood handle brushes should always be stored flat or hanging down to prevent water from soaking into the handle.
2. Acrylic brushes should be stored flat, but can be stored upright if most of the water has been dried from the hairs.
3. When storing natural hair brushes for the summer or long periods, dip the brushes in liquid hand or dish soap, wipe the excess, reshape the head, and allow the brush to dry. This will seal the hairs, eliminate mites from getting to the brush, and ensure the brush head keeps its shape.
4. Do not store brushes in cramped quarters where the hairs can get bent out of shape and break.
5. While brushes are not made to last forever, good care can help extend their life time significantly.

- If acrylic paints dry in the hairs, the brush may be ruined, the hairs permanently damaged.
- Try not to soak handles. Water levels should only be to the crimping on the ferrule. Wetting handles will cause cracking and loosening of the ferrules. Dry handles after every cleaning.
- Clean immediately after painting. Do not let any paint sit or dry in the hairs.
- Occasionally, you can clean the brushes with regular hand soap, reshape and let dry.
- Be gentle when using cake paints. Coarse scrubbing can permanently damage the hairs and force paint into the ferrule.
- For natural hair brushes, occasionally use brush conditioner. This will keep the hairs from drying out and breaking.

CLEANING BRUSHES

Water-based media: Rinse the brush several times in clean water. Lather (use a good brush cleaner) up the brush and swirl it around in the palm of your hand, then rinse; continue until all of the rinse water is colorless and all of the cleaner is removed.

Other media: Rinse the brush in solvent until all of the color is removed. Wipe the brush back and forth on paper towel or rags to work the solvent throughout the brush and remove all color.

CHOOSING THE RIGHT BRUSH

Choose just the right style of brush from our wide selection to get exactly the stroke or texture you want. The guide below will help you pick the best tool to achieve the right look.

- taklon round**: Paint broad lines, round areas, stroke work
- taklon fan**: Blend colors, create texture, grass, fur, foliage
- angular**: Paint angled shapes, sharp edges and float colors
- comb™**: Paint multiple lines in one stroke for fluffy Santa beard
- natural mop**: Blend delicate colors and soften edges of objects
- shader**: Blend or float colors, lettering, and basecoating
- natural round**: Paint broad lines, round areas, stroke work
- ox glaze**: Blend colors, apply glazes, and basecoat
- natural flat**: Blend or float colors and basecoating
- glaze/wash**: Float and blend colors, make broad square strokes and basecoat large objects
- filbert**: Paint and blend round petals, leaves and strokes
- stencil**: Stencil painting or stippling on any surface
- bristle flat**: Blending heavy colors, dry brushing, and basecoating
- bristle round**: Blending heavy colors, dry brushing, and basecoating in rounded areas
- bristle fan**: Blend colors, create texture, grass, fur, and foliage
- liner**: Extra thin lines, small strokes, and the finest details
- detail**: Paint angled shapes, sharp edges, and float colors in tight areas
- script**: Extra long strokes, lines and scrolling
- triangular**: Triple load with color to create unique blends in stroke work
- dagger**: Banding fine lines, stems, long leaves and stroke designs
- wisp™ angular**: Paint multiple lines in one stroke, feathers, foliage, plaids and hair
- wisp™ fan**: Paint multiple lines with one stroke, banding multiple lines, curls and splattering
- wisp™ flat**: Paint multiple lines in one stroke, cross hatching and squiggles
- wisp™ filbert**: Paint multiple lines in one stroke, grass, hair, fur and detail flower petals
- funky pouncer™**: Add texture with gels, acrylics, oils, watercolor stains and glazes
- natural fan**: Large area washes, ceramic underglazes and glazes
- hake**: Large area coverage, washes, ceramic under glazes and glazes
- bamboo**: Ceramic glazes, underglazes, lettering, strokes and washes
- tight spot**: Paint in hard-to-reach spots
- Mr. Big Sweep™**: Fine lines, large area washes, ceramic underglazes and glazes

BEST VALUE ARTIST BRUSHES

new look!

Our best value artist brush sets have been updated to improve the customer experience and heighten shelf appeal with colorful packaging and pearlized-finish handles.

Pearlized-finish hardwood handles

Packaging and brush handle color identify hair type

BETTER ★★★★★

Bristle - These firm natural bristle round and flat brushes are perfect for high-viscosity color application and applying non-fired colors and drybrush techniques for ceramics. Our soft fan series is the ideal brush for ceramic glaze application and color washes. The stiff fan is designed for stippling patterns and thicker crystal glaze purposes.
